Attachment to Advisory Action

Applicants' amendment filed on 5/22/2008 has been fully considered; however, the

amendment has not been entered given that it is not in compliance, it introduces the issue of new

matter and raises other new issues that would require further consideration and/or search.

With respect to non-compliance issues, see the attached "Notice of Non-Compliant

Amendment." Although not in compliance, in the interest of better enabling the applicants to

assess the patentability of their claims, the following advisory is given.

With respect to the issue of new matter, claims 1, 18, 27, and 29 recite that "the

composition is pourable." It is the examiner's position that this phrase fails to satisfy the written

description requirement of 35 USC 112, first paragraph since there does not appear to be a

written description requirement of the phrase "the composition is pourable" in the application as

originally filed, In re Wright, 866 F.2d 422, 9 USPQ2d 1649 (Fed. Cir. 1989) and MPEP 2163.

While there is support for the exemplified composition being conveyed by "pouring" on page 30,

line 22 in the specification, there is no support for all claimed compositions being capable of

being poured, i.e., "pourable."

With respect to other new issues, claims 1, 18, 27, and 29 have amended to include a new

limitation, i.e. that "the composition is pourable." It is the examiner's position that this is a new

issue since this is a new limitation from the specification. Therefore, the amendment would

require further consideration and/or search.

5/30/2008
